Salt Lake City, UT 84180-1203

Re: ECDC Mine Site Plan

Dear Holland:

The ECDC Mine Site Plan was submitted to you for review on March 15, 1993. Some **corrections** need to be made on the following pages:

Page Two: (Written Text)

Under the heading, "Reclamation, Dust Control, Public Safety", the text, as originally submitted, states:

"Any highwalls created during the mining operation will be regraded to 3:1 or flatter slopes...".

The statement should be corrected to read as follows:

"Any highwalls created during the mining operation will be regraded to at least a 2:1 slope or flatter where practical or to the approximate original contours,...".

Page Two: (Notice of Intention to Commence Large Mining Operations form)

Item 4 - Company Representative should be changed to read:

Gary Nielson
Manager of Landfill Operations
1111 West Highway 123
P. O. Box 69
East Carbon, UT 84520

Please delete Harold R. Marston's name from the application.

Page Seven: (Notice of Intention form)

Item IV - Impact Assessment

The text, as originally submitted, states:

"Slope stability will be controlled with slopes being limited to 3:1 or flatter."

The statement should be corrected to read:

"Slope stability will be controlled with slopes being limited to at least 2:1 or flatter where practical."

Page Eight: (Notice of Intention form)

Item 3(b) - Backfilling and Grading

The text, as originally submitted, states:

"Material not hauled to the landfill will be graded to 3:1 or flatter slopes..."

The statement should be corrected to read:

"Material not hauled to the landfill will be graded to at least 2:1 or flatter slopes where practical and to approximate original contours."

I appreciate you making these changes as indicated.

Sincerely,

CREAMER & NOBLE, INC.

Stan Adams, P.E.
